Objectives

- Landscape of consumer research patent tools
- To understand the US market for consumer/market research tool

Introduction

American Marketing Association define Market Research, " as the function which links the consumer, customer and public to the marketer through information that is used to identify and define marketing opportunities and problems; refine and evaluate marketing actions, monitor marketing performance and improve understanding of marketing as a process.

Why Market research?

1. To understand the psychology of how consumers think, feel, reason, and select between different alternatives e.g. brands, products, and retailers.
2. To understand the psychology of how the consumer is influenced by his or her environment e.g. culture, family, signs, media.
3. How limitations in consumer knowledge or information processing abilities influence buying decisions.
4. How consumer motivation and decision strategies differ between products that differ in their level of importance or interest that they consider for consume.
5. So that marketers can adapt and improve their market strategies and marketing campaigns to reach the consumer more effectively.

Market Research Tool

In global, intensely competitive markets, companies are required to respond incessantly to market change. Businesses must continuously innovate and introduce new products in an environment where the cost of launch is high and markets are already cluttered and all for a more discerning and savvy customer.

Customer research Tool or Market Research tool can help companies to identify and select target markets and formulate the appropriate marketing mix and positioning to reach them by significantly minimize risk.

Existing Market Research Tool

Homescan Online®

Homescan Online is the first service to measure both consumers' offline purchasing behavior and their online purchasing activity. With Homescan Online, Consumer Packaged Goods (CPG) marketers can make a direct connection between online marketing activity and offline purchasing behavior.

For CPG Marketers

- **Consumer Segmentation and Targeting:** Understand your product purchasers and their online behavior. Find out who they are, and when and how often they're online. Learn which Web brands, categories and channels attract high-volume buyers. Discover which online demographics drive the most volume.
- **Media Allocation:** Create winning media plans based on actual buyer behavior. Maximize reach and frequency by targeting the most efficient Web sites for your brand. Allocate online spending effectively relative to other media types.
- **Advertising and Promotions:** Analyze the effectiveness of online ads and promotions by measuring actual offline purchasing behavior among consumers exposed to them. Calculate your online media program's ROI and develop strategies to improve it.

PersonicX®

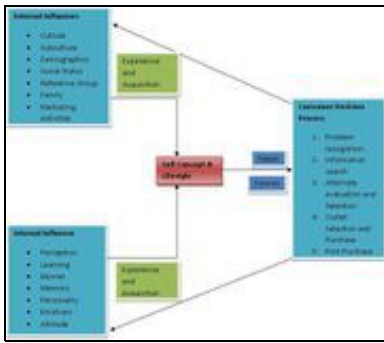

PersonicX is a household-level segmentation and visualization system that clusters U.S. households into one of 70 segments within 21 life stage groups based on specific consumer behavior and demographic characteristics.

MicroBuild®

Microbuild is a household demographic product that provides current, accurate, precise, and actionable household and population information for the U.S. It provides demographic statistics by census block, block group and higher geographies which provides researchers with a longitudinal perspective for these geographies.

Consumer Behavior Model

source: Hawkins et al., 1998

External and internal factors contribute to the formulation of self-concept and lifestyle, which affects the consumer decision process. During this process, experiences and acquisitions update the original external and internal influences.

This model helps marketers to understand the psychology of how consumers think, feel, reason, and select between different alternatives e.g. brands, products, and retailers. and how the consumer is influenced by his or her environment e.g. culture, family, signs, media.

Market Segmentation

Segmentation is essentially the identification of subsets of buyers within a market that share similar needs and demonstrate similar buyer behavior. Businesses need to deliver their marketing message to a relevant customer audience. If the target market is too broad, there is a strong risk that (1) the key customers are missed and (2) the cost of communicating to customers becomes too high / unprofitable. By segmenting markets, the target customer can be reached more often and at lower cost.

Market Overview

Market Research Industry In US

Key Industry Statistics are given in the following table:

Key Industry Figures	2010
Industry Revenue (\$M)	14471.5
Revenue Growth (%)	1.8
Employment (Units)	141054
Total Wages (\$M)	5451.5

Following table contains the top 10 players in Market Research Industry in year 2010

Rank		Company	US research revenue(\$ Million)	% change from 2009	Non US research revenue(\$ Millions)	No. of full time staff
2010	2009					
1	1	Nielsen	2407	4.5	2551	9566
2	2	Kantar	914.7	7.5	2268.9	4135
3	3	IMS Health	801	*NC	1410.5	1560
4	5	Symphony IRI Group	457	2.4	240	1198
5	4	Westat Inc.	455.3	-9.4	NA	1964
6	6	Arbitron	390.4	2.8	5	951
7	7	Ipsos	379.6	9	1133.2	1246
8	8	Gfk	290.9	0.6	1471.1	877
9	9	Synovate	235.8	9.9	649	762
10	11	The NPD Group	173.7	4.8	66.4	815

Interactive Marketing

For years marketing and advertising were largely unidirectional. They controlled the message, the medium, the product and the price. Customer only 'voice' was whether or not we purchased the product or service.

In today's world, the customer is king, and it is the responsibility of the business owners to cater to the whims and fancies of their clients. Interactive marketing is able to handle this aspect better as it is personalized and two way communication. Traditional marketing strategies were based on a 'push' methodology where managers were literally pushing the products onto the customers and providing little information of customers psychological needs and changes over time. On the other hand, **interactive marketing** acts on 'pull' methodology, where the power of selection lies with the customers. Thus interactive marketing helps companies to understand their market better.

The following graph shows the US interactive marketing spend in 2009 and forecasting from 2010 to 2014:

source: Forrester Research, Inc.

Interactive marketing spend and percent of all ad spend in 2009 and forecasting till 2014, and respective CAGR are shown in the following table:

Interactive Marketing Spend (US \$ Million)	2009	2010	2011	2012	2013	2014	CAGR
Mobile Marketing	391	561	748	950	1131	1274	27%
Social Media	716	931	1217	1649	2254	3113	34%
Email Marketing	1248	1355	1504	1676	1867	2081	11%
Display advertising	7829	8395	9846	11732	14339	16900	17%
Search marketing	15393	17765	20763	24299	27786	31588	15%
Total	25577	29012	34077	40306	47378	54956	17%
Percent of all ad spend	12%	13%	15%	17%	19%	21%	

Source: Forrester Research, Inc.

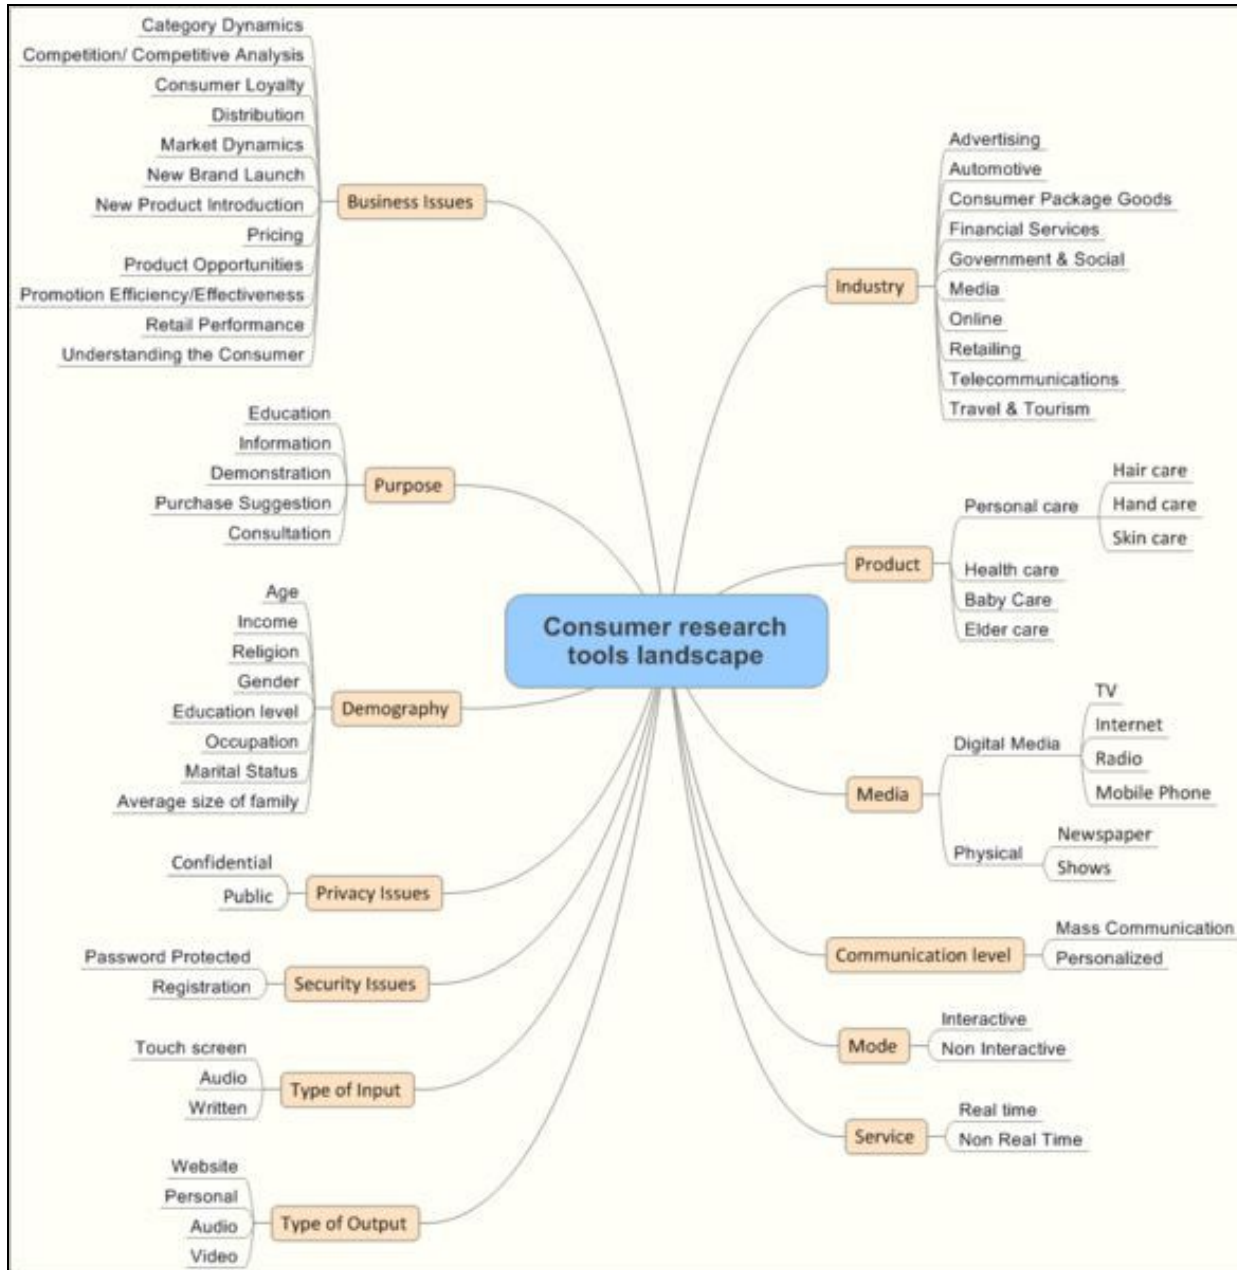

Following table shows the industry interactive marketing budget for 2009:

Industry Interactive Marketing Budget (US \$ Million) 2009	Travel and Hospitality	Financial Services	Consumer Goods	Retail and wholesale trade	Media and Entertainment	High-tech and Manufacturing	Business services
Mobile Marketing	18	11	3.75	12	3.6	2.79	1.2
Social Media	6	10	15	5.5	8.8	4.7	0.24
Email Marketing	3	3.2	1.5	2.3	1.85	1.25	0.5

Display advertising	0.68	0.2	1.4	0.4	0.25	0.55	0.3
Search marketing	1.43	0.75	0.5	0.25	1.23	0.3	0.03
Total Interactive Marketing Budget	29.11	25.15	22.15	20.45	15.73	9.59	2.27
Percent of total Marketing Budget	29%	3%	2%	14%	2%	10%	19%

- Consumer product goods (CPG) companies are expected to grow their interactive marketing spend by a 22% compound annual growth rate (CAGR) ? more than any other industry. Source:forrester.com

PLEASE NOTE

- Relevancy for the search is 22%
- The class codes used cover 70% of the AC Nielsen patents pertaining to the given parameters
- Attempts to cover the balance 30% of AC Nielsen patents results in too much garbage since these patents fall in several dozen different class codes.
- A pure keyword based search based on studying the 70% patents maybe attempted at the end of this project review cycle to find more relevant patents that may miss from this search.

Classification codes and definition

S. No.	IPC class codes and definition	
1	G06Q	DATA PROCESSING SYSTEMS OR METHODS, SPECIALLY ADAPTED FOR ADMINISTRATIVE, COMMERCIAL, FINANCIAL, MANAGERIAL, SUPERVISORY OR FORECASTING PURPOSES; SYSTEMS OR METHODS SPECIALLY ADAPTED FOR ADMINISTRATIVE, COMMERCIAL, FINANCIAL, MANAGERIAL, SUPERVISORY OR FORECASTING PURPOSES, NOT OTHERWISE PROVIDED.
2	G06Q 30/00	Commerce, e.g. marketing, shopping, billing, auctions or e-commerce
3		ELECTRIC DIGITAL DATA PROCESSING
4	G06F 1/00	Details not covered by groups G06F 3/00-G06F 13/00 and G06F 21/00 (architectures of general purpose stored programme computers G06F 15/76)
5	G06F 17/00	Digital computing or data processing equipment or methods, specially adapted for specific functions
6	G06F 17/30	Information retrieval; Database structures therefor
7	G06F 11/30	Monitoring
8	G06K	RECOGNITION OF DATA; PRESENTATION OF DATA; RECORD CARRIERS; HANDLING RECORD CARRIERS

Sample patents

Patent/ Publication No.	Title	Abstract	Dolcera Summary	Publication Date	Assignee
US7891488	Interactive product selection system	The present invention involves an interactive selection system for a consumer product that improves the consumer's ability to quickly sort through numerous criteria in a complex decision making process and determine whether that particular consumer product is appropriate for his or her purchase and use. The interactive selection system is designed for a consumer product wherein the product is appropriate for less than all consumers comprising: (a) an interface; (b) at least one product selection device associated with the interface, wherein each product selection device is comprised of: (i) decision criteria that are relevant to appropriate selection or deselection of the product, (ii) at least two selectable responses associated with each decision criteria, wherein there is at least one positive selectable response and at least one negative selectable response for each decision criteria, and (iii) selection indicia associated with each selectable response; (c) directive instructions which direct an operator to manipulate each product selection device to choose a consumer applicable response from the available selectable responses per decision criteria; and (d) interpretive instructions which explain how to interpret the pattern of selection	Interactive selection system for a consumer product particularly OTC pharmaceuticals, offers a visible and prominent display that allows potential consumers of the product to input personal information at the point of sale and obtain specific feedback on whether the consumer product is appropriate for the consumer.	22-Feb-11	McNeil-PPC, Inc. (Skillman, NJ) Merck Sharp & Dohme Corp. (Rahway, NJ)

		indicia which is observably associated with the chosen one or more consumer applicable responses to assist with determining whether or not the product is appropriate for the consumer's purchase or use.			
US7104800	Article and method for selection of individualized personal care products	A diagnostic article and method is disclosed wherein the article includes a mirror, a plurality of attribute selection sites arranged along or associated with the mirror with each of the sites having a plurality of choice selectors, and an output for recommending at least one personal care product based upon input from the choice selectors. A diagnostic for skin includes attribute selection sites hosting questions related to a customer's age, skin coloration, dryness, sunburn susceptibility, pimple breakout affinity, wrinkle formation and pore size. Hair, dental and underarm products may also be personalized by the diagnostic system. The mirror allows a customer in-store to more accurately answer attribute questions through reference to the customer's mirror reflection.	A interactive diagnostic article is provided which includes: (i) a mirror; (ii) a selection sites arranged along or associated with the mirror, the sites having choice selectors; and (iii) an output for recommending at least one personal care product based upon input from the choice selectors.	12-Sep-06	Unilever Home & Personal Care USA, division of Conopco, Inc. (Greenwich, CT)
